AUTOMATIC WATER PUMP CONTROLLER

Dimensions in mm

AUTOMATIC PUMP CONTROL
REPS
Type: RPC-1500
Max.10bar(1MPa) Max.65°C
Max.10A / 1.5KW (2HP)
IP65

- Power on
- Pump on
- Failure
- Restart
220V-240V~/50-60Hz

AUTOMATIC PUMP CONTROL
REPS
Type: RP-1500
Max.10bar(1MPa) Max.65°C
Max.10A / 1.5KW (2HP)
IP65
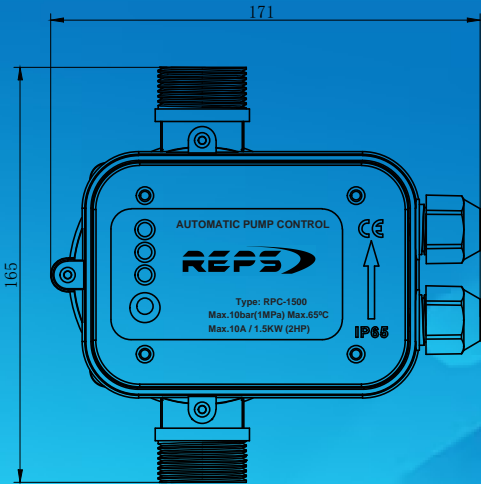

- Easy installations
- Reduced dimensions
- Pump protection against running dry, with automatic reset
- Built-in check valve
- Can be used with or without pressure tank
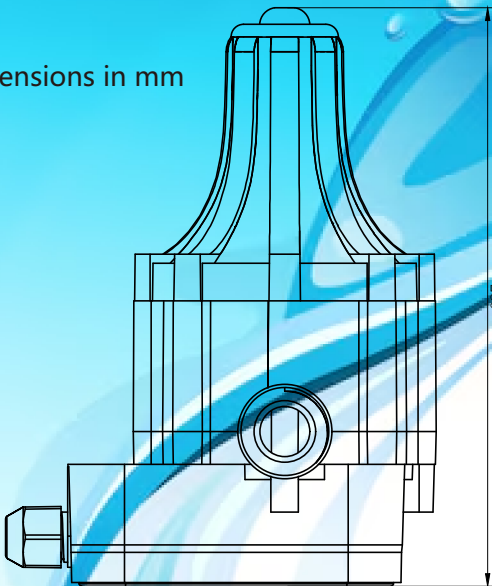

Matters Needing Attention:

1. The set pressure is not adjustable.
2. Must be installed on a water pump with a power rating greater than 200W.
3. Do not install any faucet between the controller and the pump.
4. The distance between the controller and the highest faucet should not exceed 15 meters.

Specification:

Model	RP-1500
Rated voltage	220-240VAC
Maximum working pressure	10 bar
Frequency	50-60Hz
Connection	R1"
Maximum current	8A
Protection level	IP65
Maximum power	1.5kW(2HP)
Maximum operating temperature	65 °C
Factory setting	1.5bar, stop when water pressure reach 3.5 bar
